1. Project Overview

In this project, we will be performing analysis, redesign, and implementation of a digital marketing campaign strategy for an e-learning platform. The aim is to enhance user experience, optimize the site architecture, and create a higher level of interaction with the use of contemporary designing approaches and techniques.

This project consists of several phases including website analysis, redesigning plans, SEO execution, content marketing, paid search marketing, social media marketing, and analytics tracking. All phases have been executed pragmatically to mimic the actual digital marketing process.

This project reflects the significance of systematic and user-centric strategies in making an existing platform a highly efficient system.

1. TOOLS USED

- HTML, CSS, Bootstrap
- Google Analytics
- Ubersuggest
- Canva
- Netlify
- GitHub

2. LIVE LINKS

Phase 1: Website Audit Report (Udemy)

1. Introduction :-

Udemy is an online learning site offering diverse courses in several areas like business, IT, marketing, personal growth, among others. This report aims to analyze this particular website with particular focus on UX and on-page optimizations.

Some of the critical elements that will be analyzed include the navigation system, searching mechanism, information presentation, calls-to-actions, and usability of the website. Besides, recommendations for improvement will also be given in addition to listing out the strengths and weaknesses of the site.

This analysis will be done using the actual interface of the site including its homepage, search result page, course page, and footer. These four elements play a significant role in the user interaction with the website.

1.2. Analysis of Home Page

Udemy Home Page is especially designed to attract users' attention immediately with its neat design and correct hierarchy of visuals. Elements such as "Explore", "Categories", "Search Bar" and "User Profile" can be found within the header of Udemy in the navigation bar.

The search bar is placed correctly and represents the key element for those, who are looking for a specific course. In addition, there are also several promotional banners and subscriptions that are available for users.

The structure of the content on the homepage is organized in sections such as "Featured Courses", "Categories" and others. This allows enhancing content visibility. Nonetheless, the home page may be somewhat confusing because of the excessive amount of information provided by the page.

- **Screenshot Placement :-**

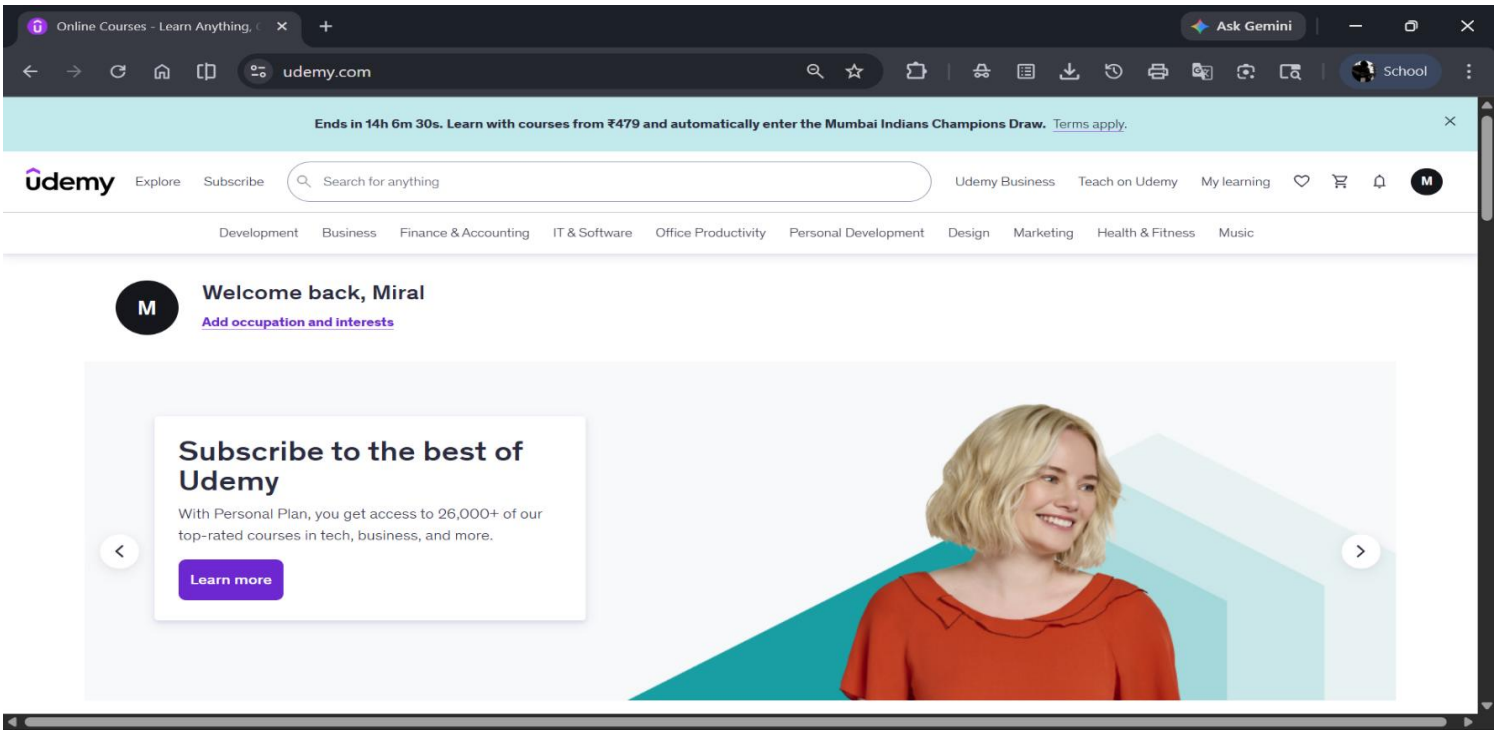

Figure 1: Udemy Homepage Interface

1.3. Analysis of Search & Navigation (150-200 words)

Udemy features excellent search facility, allowing easy course searches through the keyword-based search function. The search suggestion drop-down menu increases usability and helps reduce the amount of keystrokes while increasing precision.

The search results page design is effective with course listings featured in card form including ratings, duration, and pricing information. Ratings, levels, languages, and duration are some filtering options available, which helps navigate effectively. For a beginner, this might seem overwhelming due to many filters and options, but overall it is easy and smooth due to categorized navigation and clean design.

- **Screenshot Positioning:-**

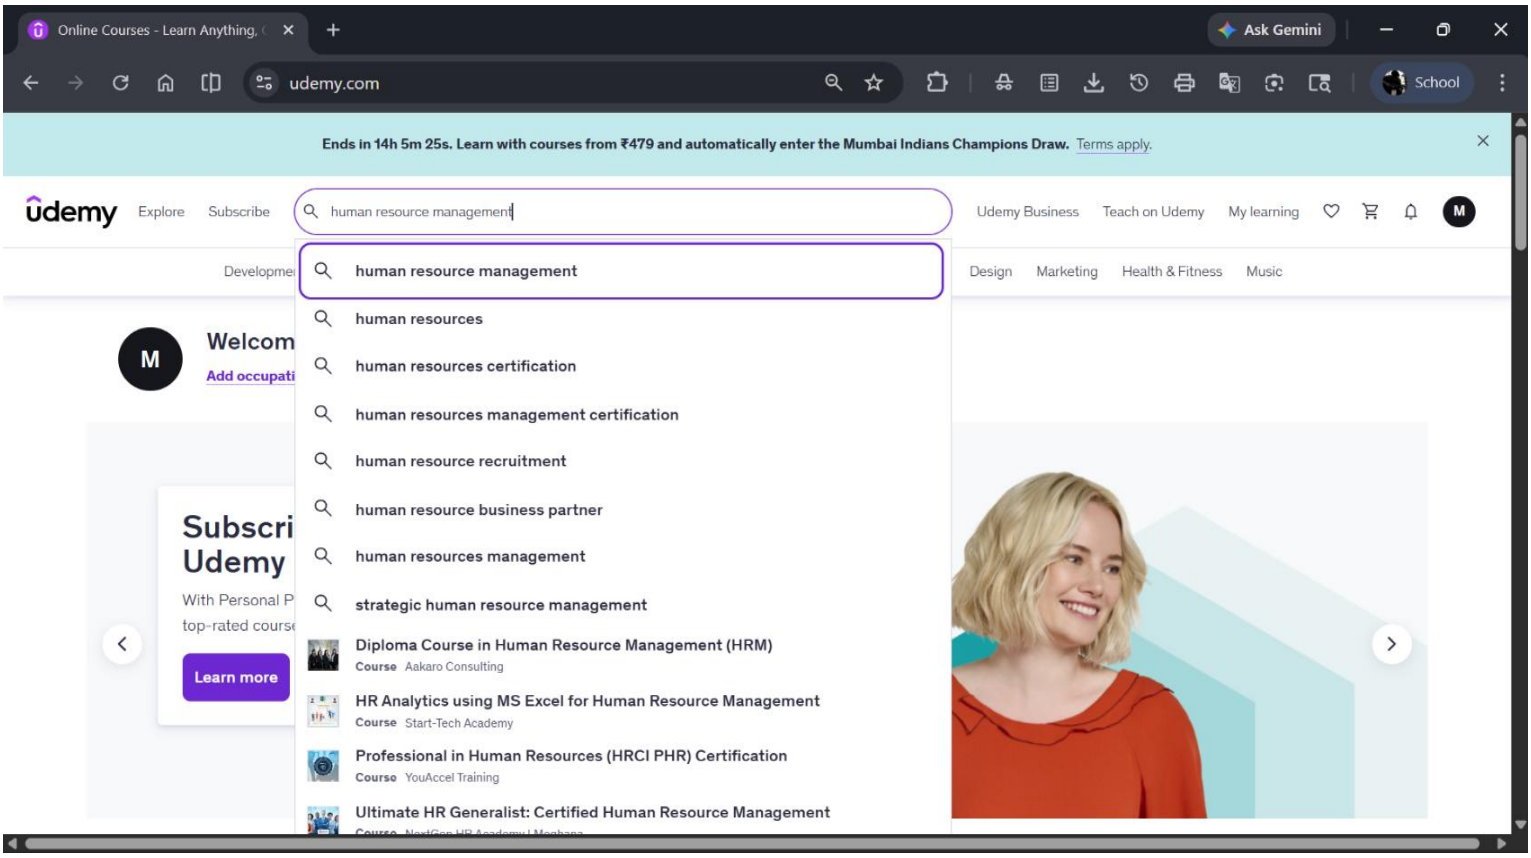

Figure 2 : Search Suggestion UI Interface Image

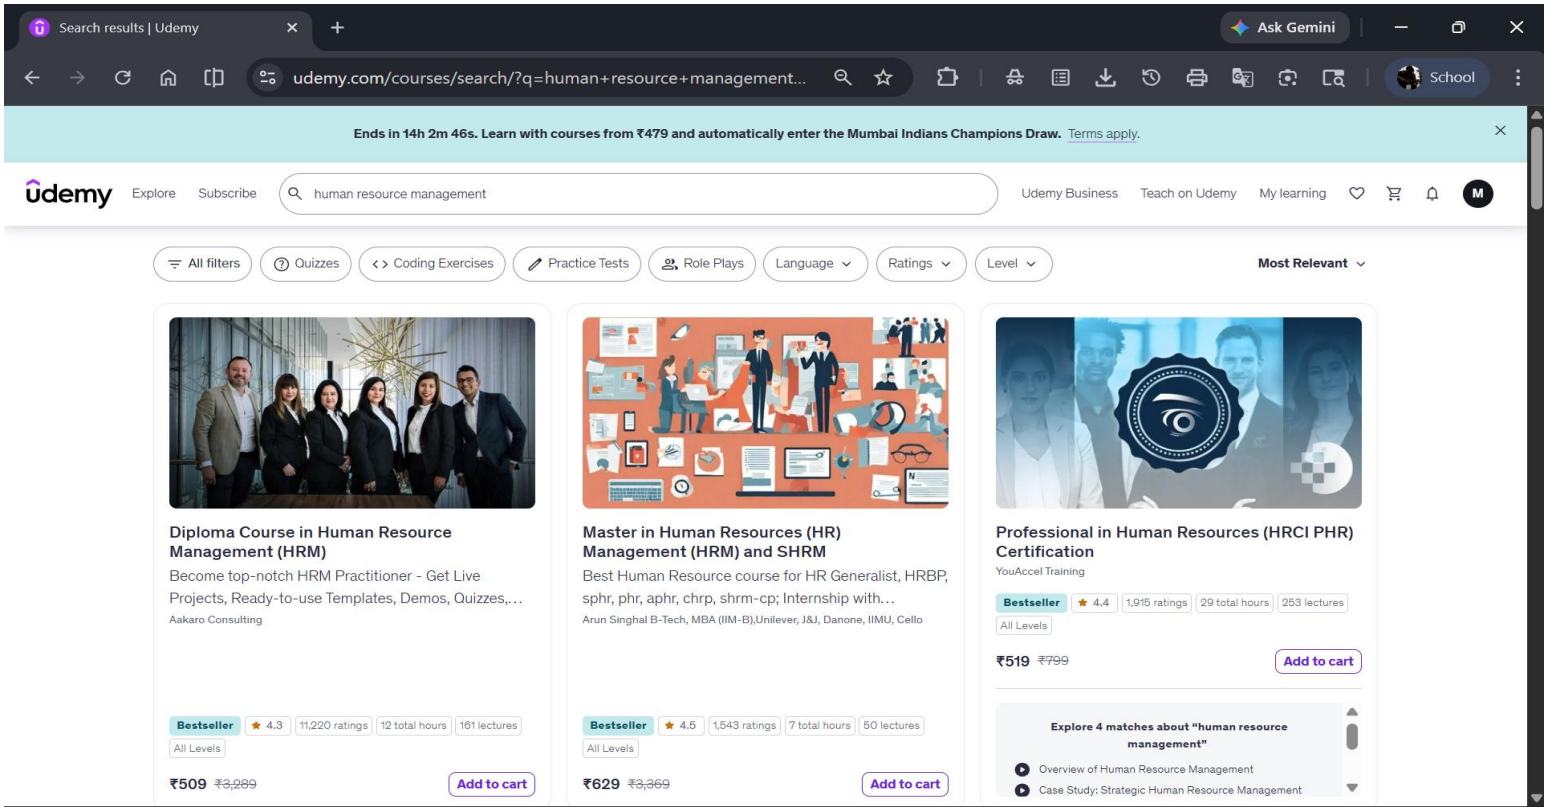

Figure 3 : Search Result Image

1.4. Course Detail Page Analysis

This page is among the critical elements of the website that significantly impact the decision-making process of users when enrolling in a course. Udemy offers complete information regarding the course, its title, instructor information, ratings, number of subscribers, and course content.

The “What you will learn” section provides a clear picture of the objectives of the course for better evaluation by the learners. The call-to-action buttons like “Start Subscription” and “Buy Now” must be placed effectively on the right-hand side of the website to make them visible.

Moreover, the addition of videos related to the course improves credibility, allowing users to make an informed purchase decision. Nevertheless, the price and subscription plan might sometimes confuse users because of the availability of various options.

➢ **Location of Screenshot:**

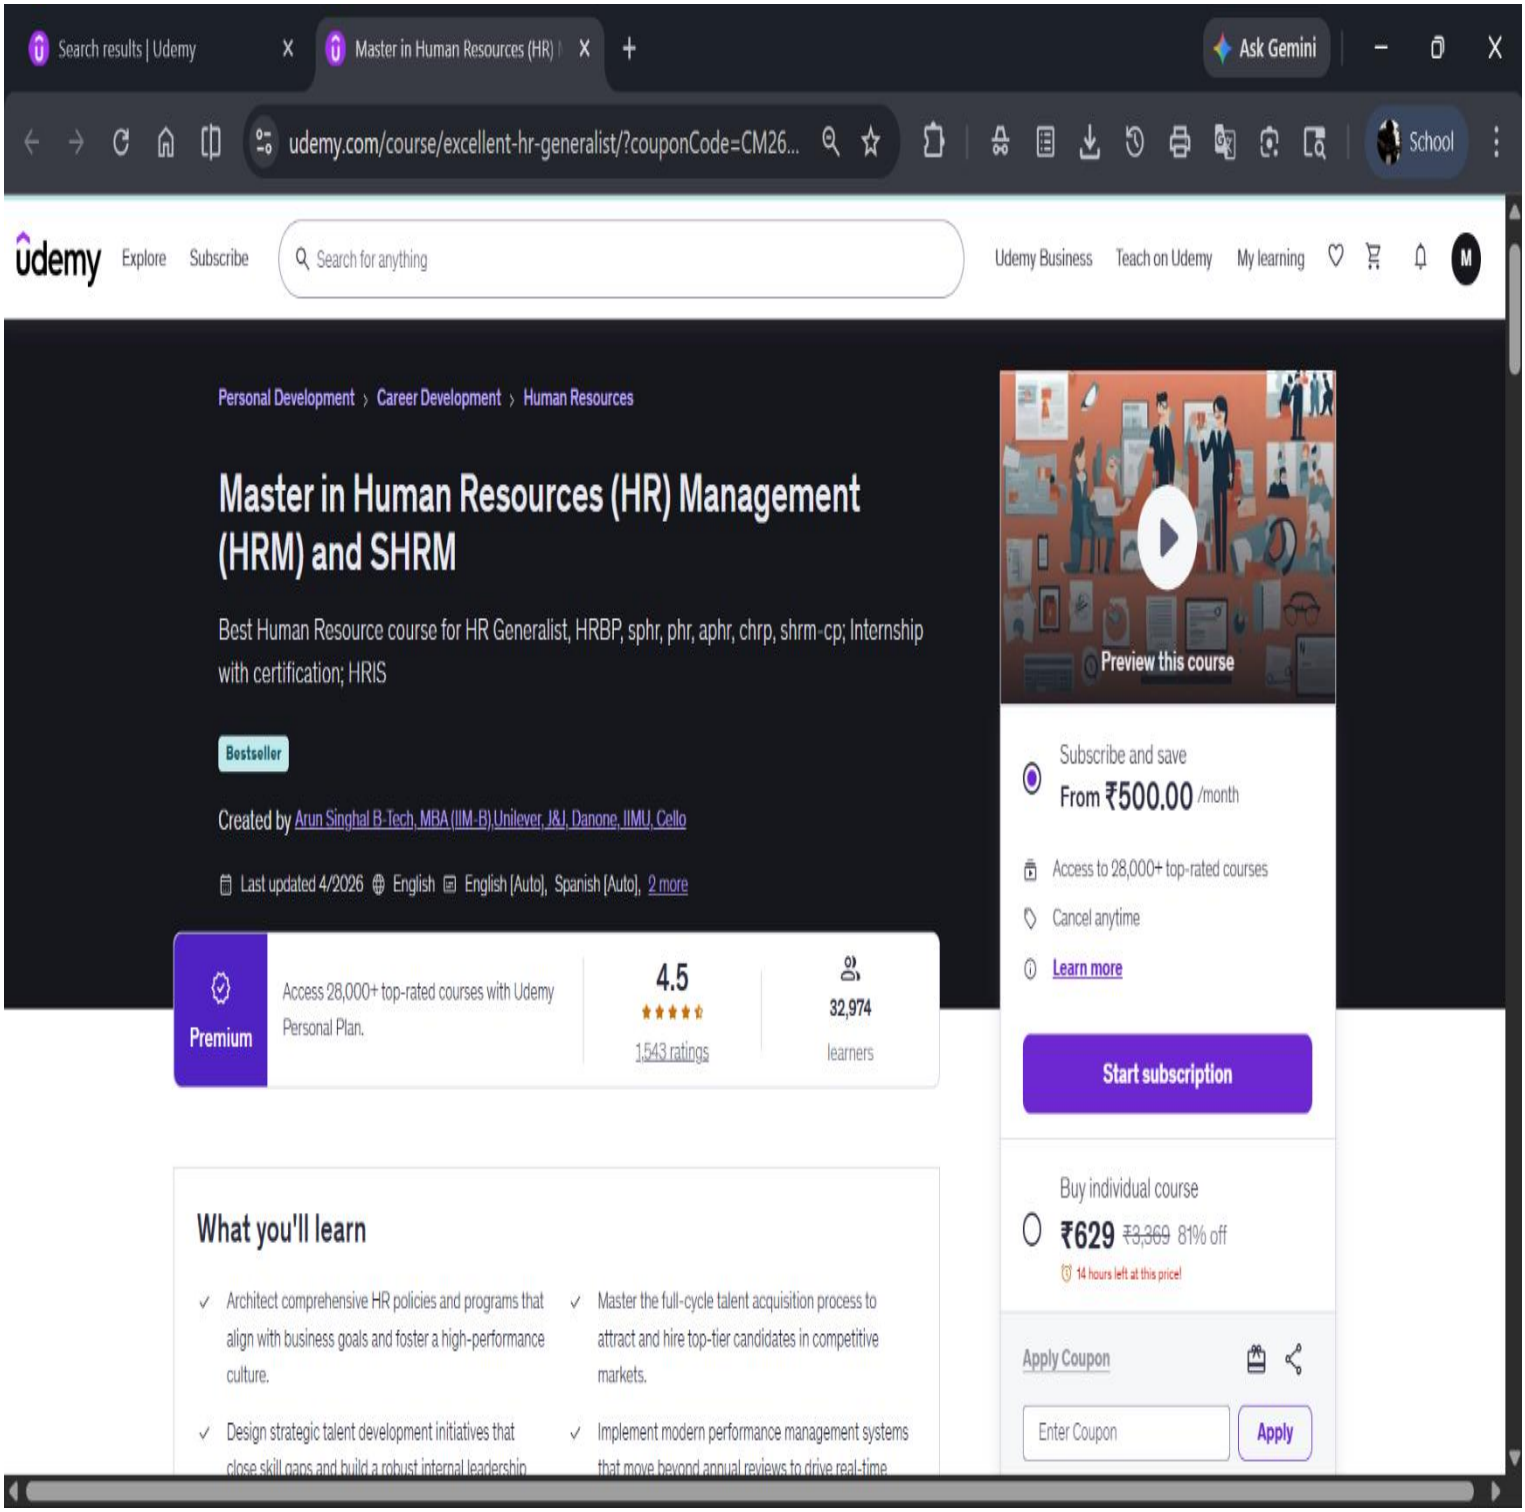

Figure 4: Course Detail Page with Call to Action and Price

1.5. Analysis of the Footer

The footer area of Udemy contains necessary links, including categories, certifications, about the company, help, and legal information. The footer area is well organized and contains several columns, enabling visitors to navigate to the required page easily without having to go back up.

The dark background applied in the footer makes it easy to read and distinguish it from other areas of the page. This footer area increases usability through secondary navigation. Sometimes the footer might contain too many links, which may confuse certain users trying to find particular information.

- **Placement of the Screenshot:**

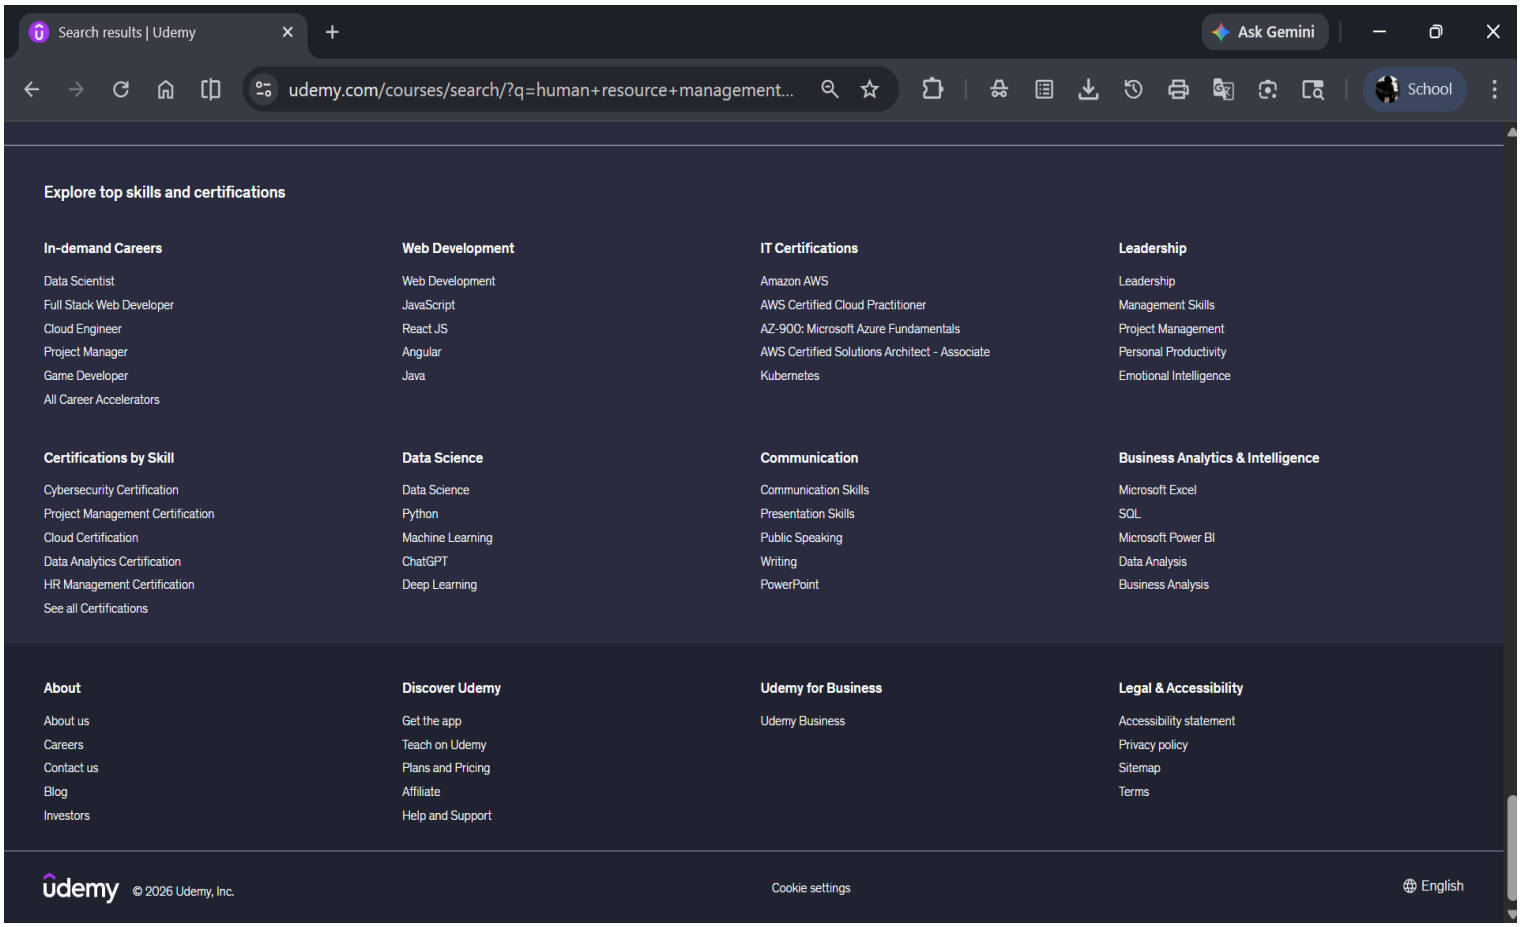

Figure 5: Footer Area of the Website

1.6 Strengths :-

- Navigation system is clear and organized
- Solid Call To Action Buttons (enroll/subscribe)
- Details about courses, ratings, and reviews
- Search engine with filters
- High-quality user interface design

1.7. Weaknesses :-

- Too much information on the homepage
- Pricing can be confusing for novices
- Heavy user interface, slowing down the website's speed on poor internet connections
- Too many filters for new users
- Lack of personalization for new customers

Phase 2 :- Website Redesign Plan (E-Learning Platform)

I. Introduction :-

This redesign stage aims at enhancing the overall UX, visual appeal, and conversion rate of the e-learning platform. After auditing the current e-learning platform called Udemy, it was discovered that there were a number of usability and design problems associated with it such as the problem of information overload, complicated pricing structures, and a bit difficult navigability for first-time visitors to the site.

This redesign project aims at designing an effective, easy to use, and conversion-oriented landing page that clearly defines the objectives of the platform and motivates users to take actions through well-thought call-to-action techniques. The main aim of this website redesign project is to make a highly visual, clean, and structured website.

The website design will be more accessible, responsive and visually structured to allow quick comprehension by visitors.

II. Before and After Comparison:-

i. Before (Current Platform-Udemy) :-

The current platform has a lot of information on its homepage that might be overwhelming for users, particularly for novices. Many categories, banners, and suggestions are presented at once, making it hard to concentrate on any particular activity.

The cost structure is also somewhat difficult since the subscription plan and individual course price are presented side by side. It could confuse users when they try to make a quick choice.

Navigation, while robust, may appear complicated due to various filters and options.

- **Screenshot Positioning:-**

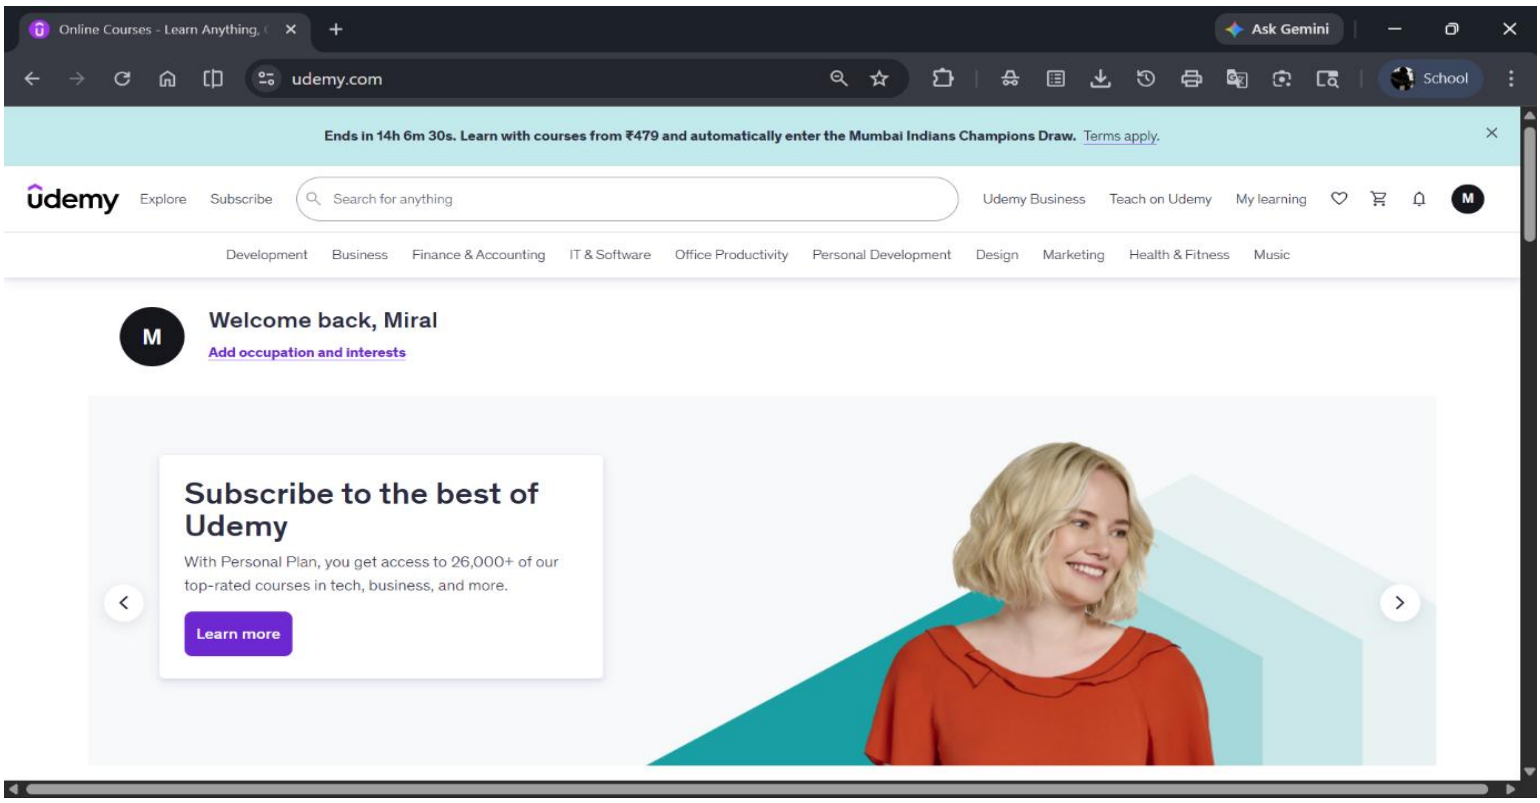

Figure 6: Udemy Homepage (Before)

ii. After (Redesigned Landing Page - Your Website)

The redesign of your website emphasizes simplicity and clarity. The presence of an effective hero section with an engaging headline and CTA button titled "Start Learning Now" instantly encourages the visitors to take an action.

The content is segmented in well organized sections like Courses, Features, Testimonials, and Pricing that will help in easy understanding and scanning.

Further, there are modern UI aspects like animations and hover effects.

- **Placement of Screenshot :-**

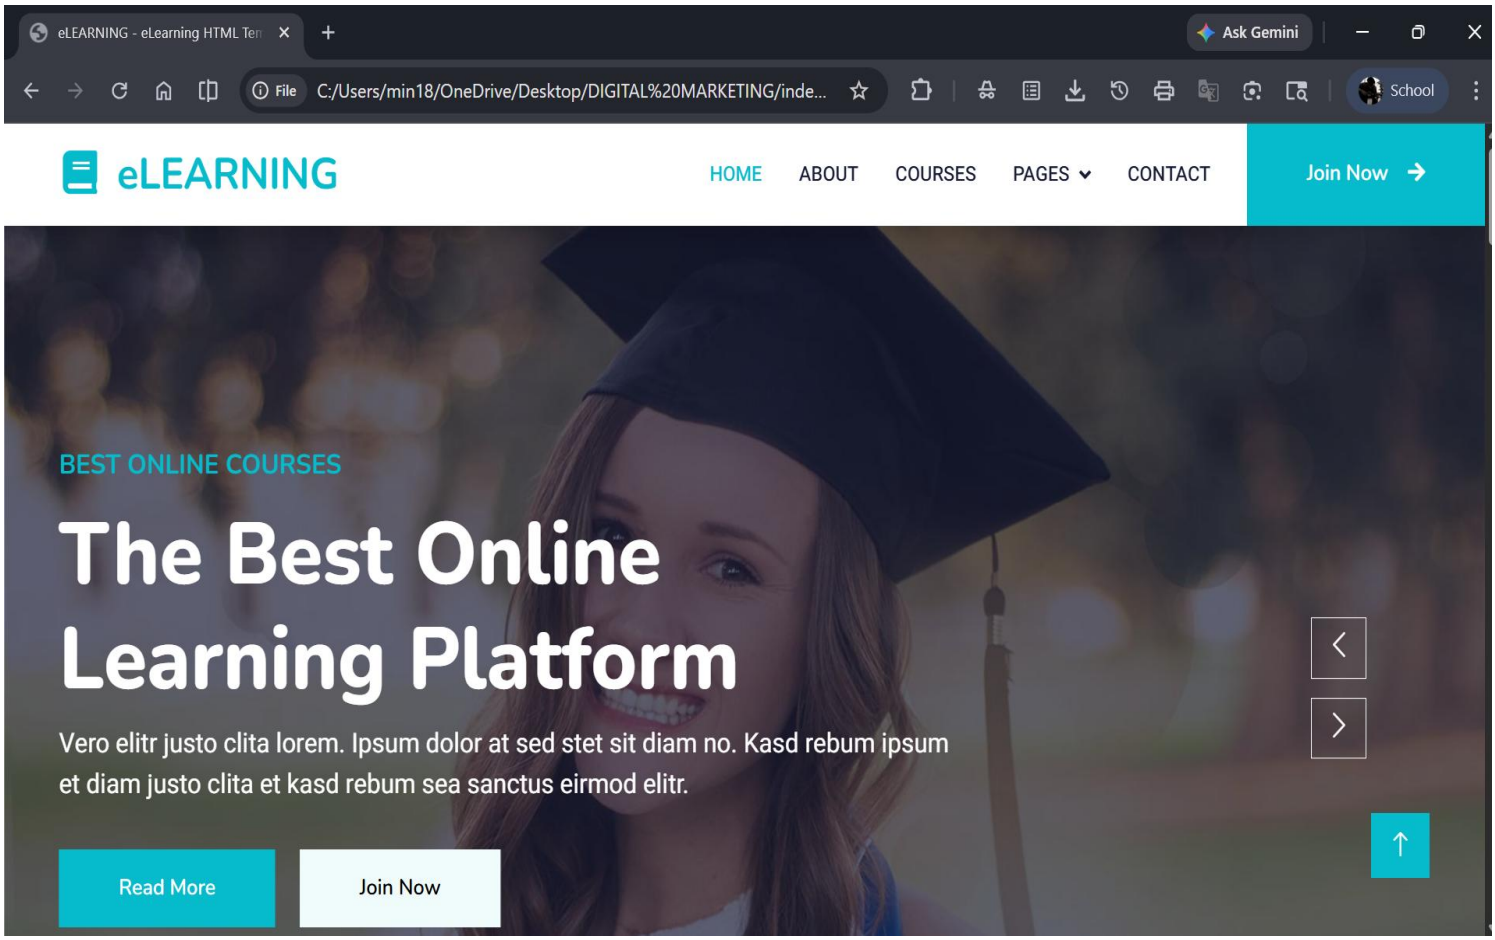

Figure 7 : Website Homepage (After)

III. Homepage Redesign :-

The redesigning of homepage is based on factors like first impression and conversion rate. This design starts off with a hero section having a heading, supportive text and also the call to action (CTA).

As compared to the existing website, all unneeded factors have been excluded to minimize confusion. There are some selected links present in the navigation bar including Home, Courses, Careers, Blog, and About Us.

In visual hierarchy, the priority for the user is to get information about what is important first, and afterwards go on to other sections. The usage of whitespace has added professionalism to the design.

- **Screenshot :-**

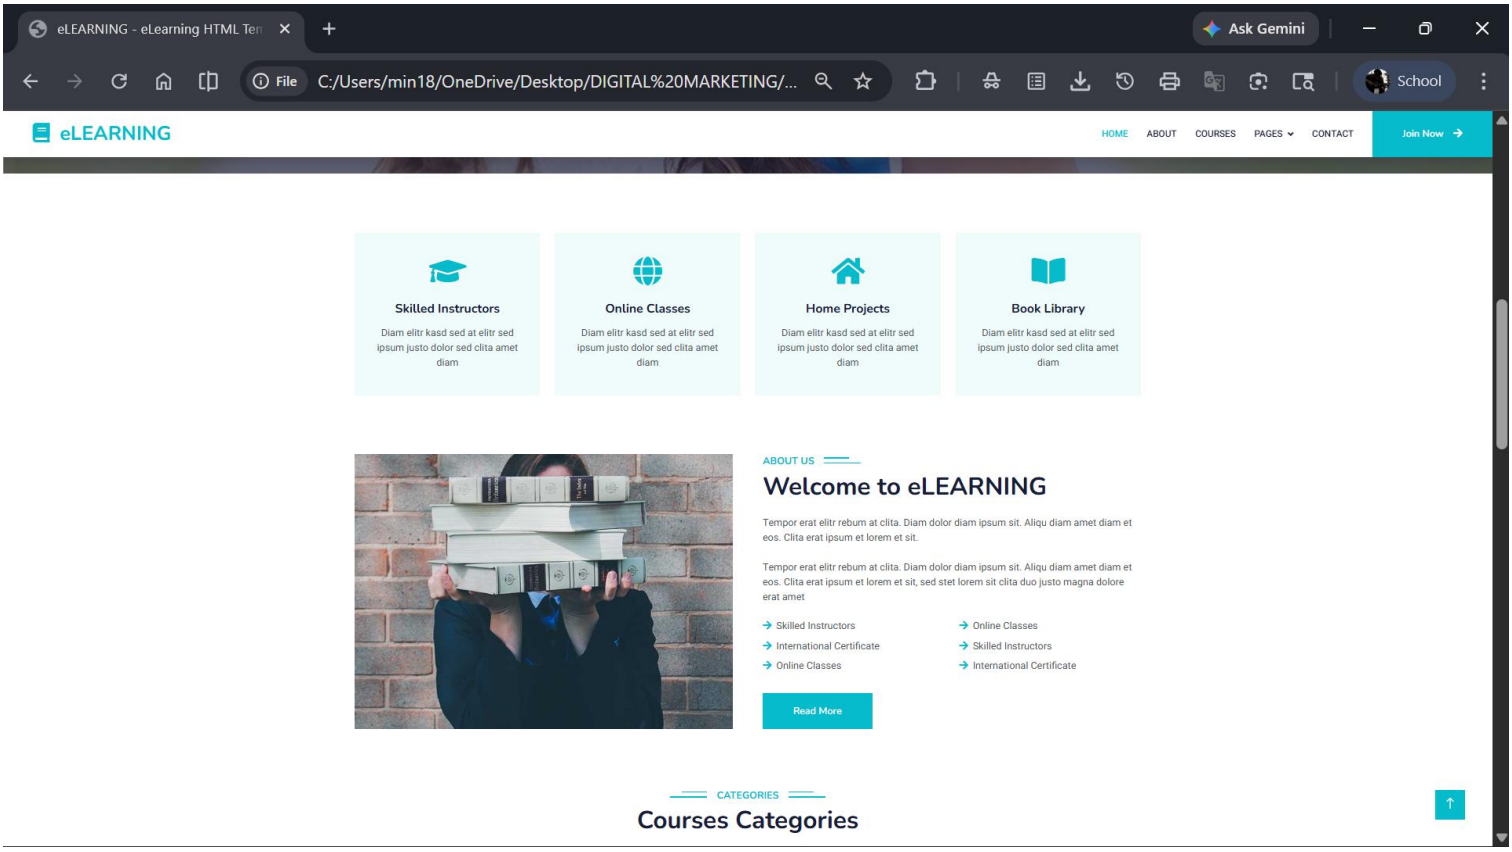

Figure 8: Homepage Design

IV. Improvements to the Course Section :-

The course section has been revamped for enhanced readability and user engagement. The courses have been presented in a card form with important details like title, time taken, rating, and price.

An interesting aspect about this design is the use of hover effects that make the experience more engaging by highlighting the course when hovered upon.

In contrast to the original website, the revamp eliminates unnecessary details, providing only the most crucial information.

- **Screenshot :-**

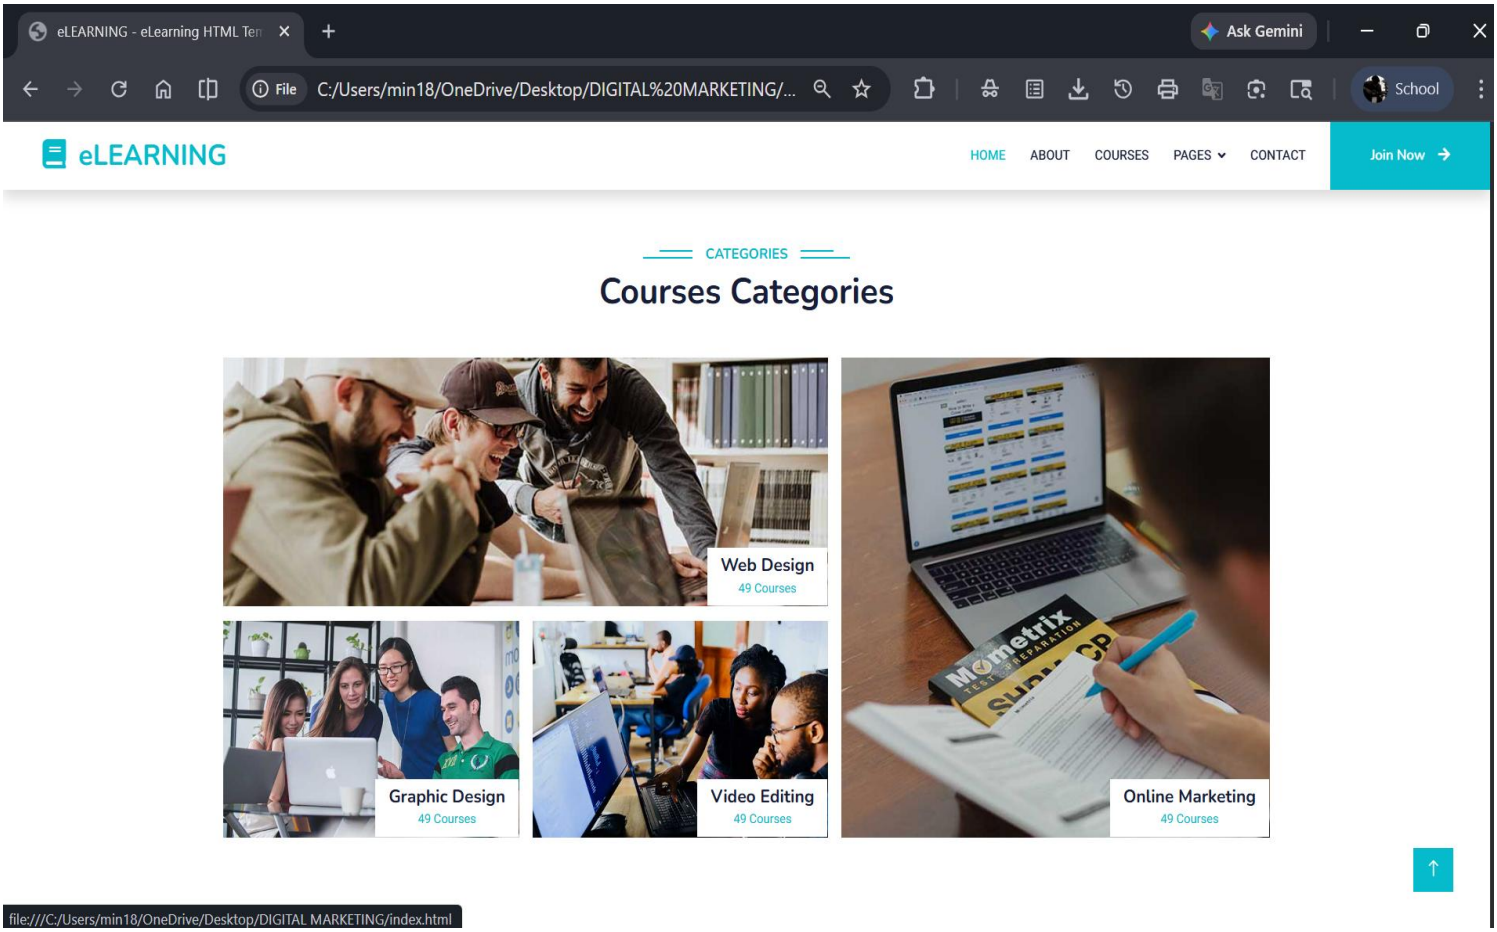

Figure 9: Course Cards

V. Rewritten Pricing Section:-

Simplification of the pricing section into standard and premium plan packages, making it easy for customers to understand the benefits and pricing for each service.

A toggle between monthly and yearly subscriptions has been added for more convenience. Features like check marks and highlighted options help to easily distinguish the various packages.

Confusion caused by different pricing strategies in the old website has been eliminated.

- **Screenshot :-**

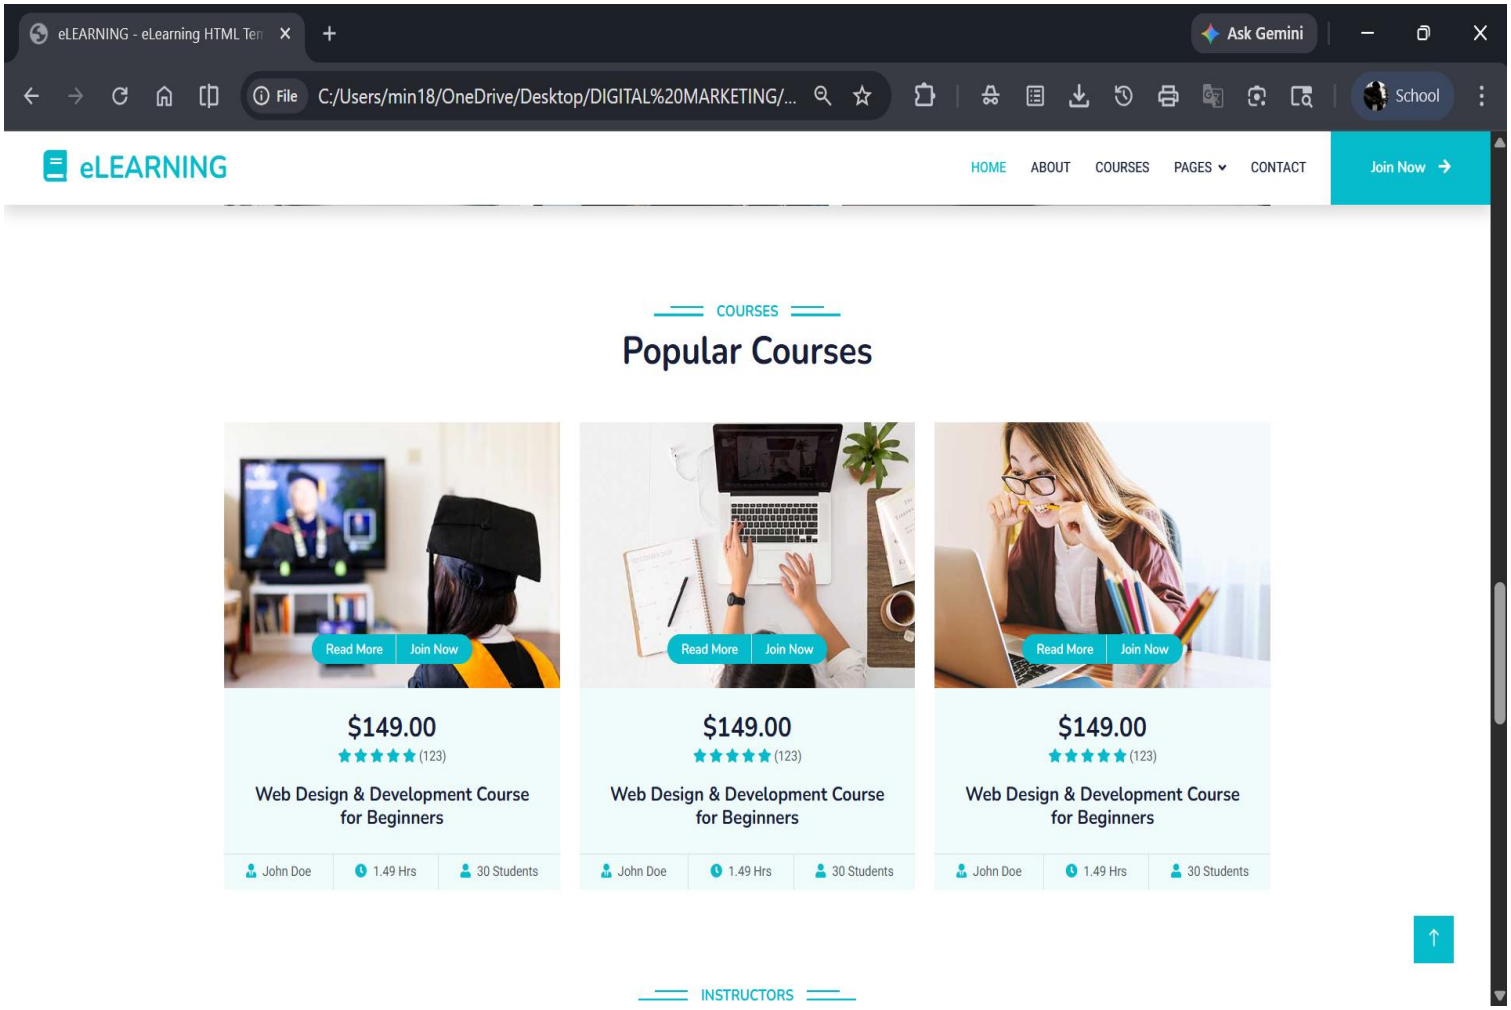

Figure 10: Pricing Plans

VI. Section for Testimonials :-

Testimonial Section has been incorporated to enhance credibility and trustworthiness. The testimonial section consists of feedback provided by students and faculty members along with their pictures.

Hover effects create user engagement and give the section an attractive look. The testimonial section did not receive much emphasis in the previous version of the platform.

Reviews contribute towards increased conversions as it provides social proof and adds credibility.

- **Screenshot :-**

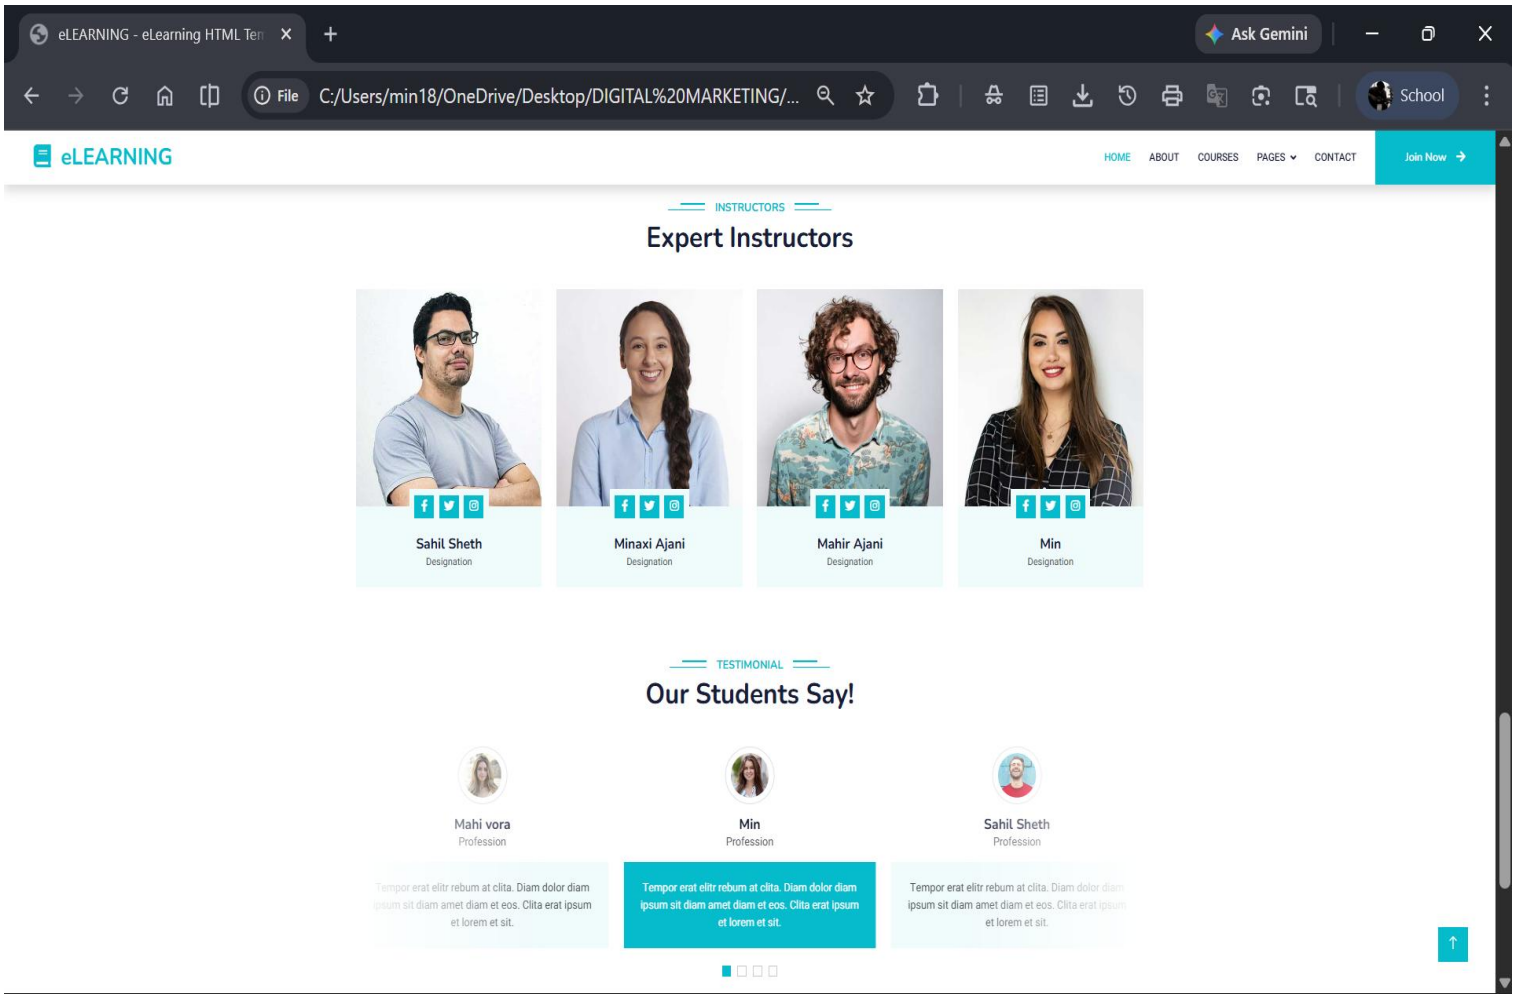

Figure 11: Testimonials Section

VII. Footer Improvements :-

The footer has been redesigned to enhance navigational usability. The footer contains categories like Courses, About Us, Support, and Policies.

There is a subscribe link for newsletters, along with contact us details, which makes the footer neat and tidy.

- **Screenshot :-**

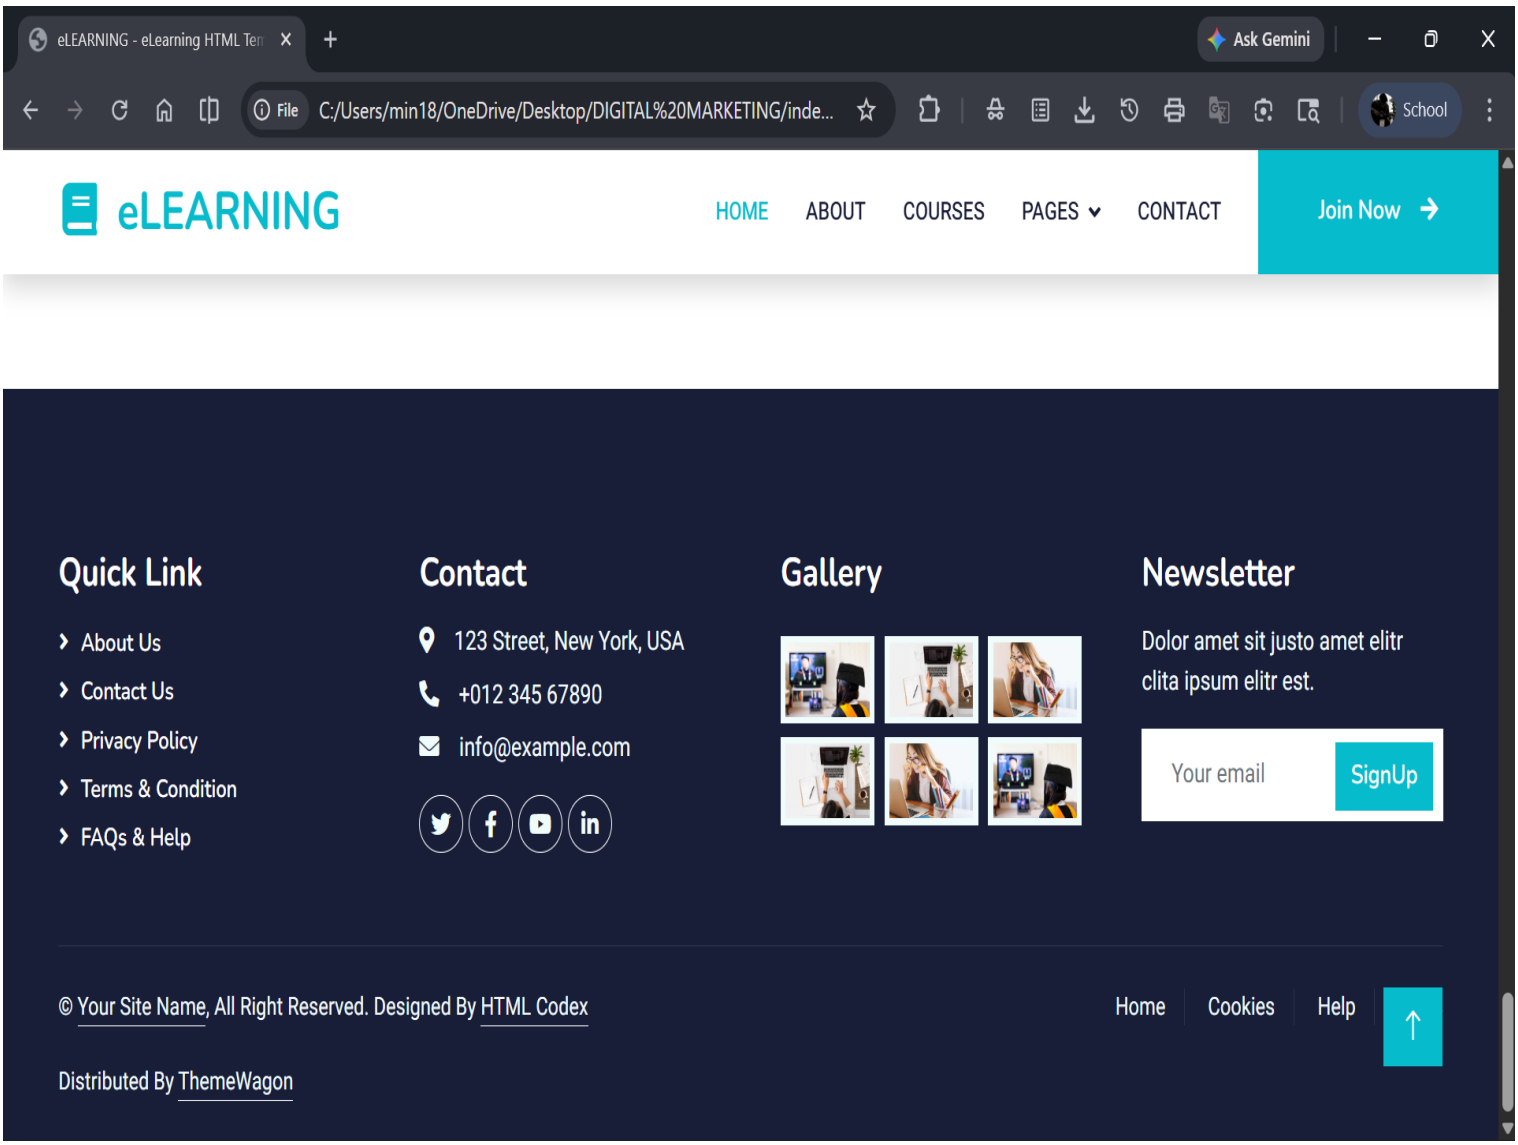

Figure 12: Footer Design

VIII. Summary of Key Improvements :-

- Improved UI design
- Visible call-to-action button
- Effective content organization
- More clear pricing information
- Testimonial to build trust
- Mobile responsiveness
- Interactive elements

Phase 3: SEO Strategy Report (E-Learning Website)

I. Introduction :-

Search Engine Optimization (SEO) is an essential aspect of digital marketing that enables websites to achieve high rankings on search engines such as Google. SEO also becomes very vital for e-learning platforms since it increases their online presence.

This particular SEO strategy will focus primarily on two major aspects: keyword research and on-page optimization. Keyword research allows you to understand what the visitors want from your website while on-page optimization makes sure that website content is optimized according to the selected keywords.

In order to optimize the redesigned e-learning website, SEO strategy needs to be implemented which will include targeting the right keywords, optimizing the website meta tags and content and making sure that images can be accessed easily.

II. Keyword Research (Ubersuggest Method):-

To conduct research and find high-quality keywords regarding online education, we performed keyword research using Ubersuggest. Here, we took the keyword “online courses,” and our location was kept at India.

Ubersuggest generated several keywords with various metrics, such as search volume, SEO difficulty, and cost per click. From these values, keywords with reasonable competition and relevance to the e-learning portal have been selected.

Keywords having a large number of searches like “online courses with certificate” are highly desirable because the demand of the user for certification courses is high. Some medium difficulty keywords include “web development course India” and “HR course online India.”

Selection of the keywords includes consideration of their search volume and level of competition. These keywords can be used in the content of the websites, title, meta tag, and image descriptions.

➢Screenshot :-

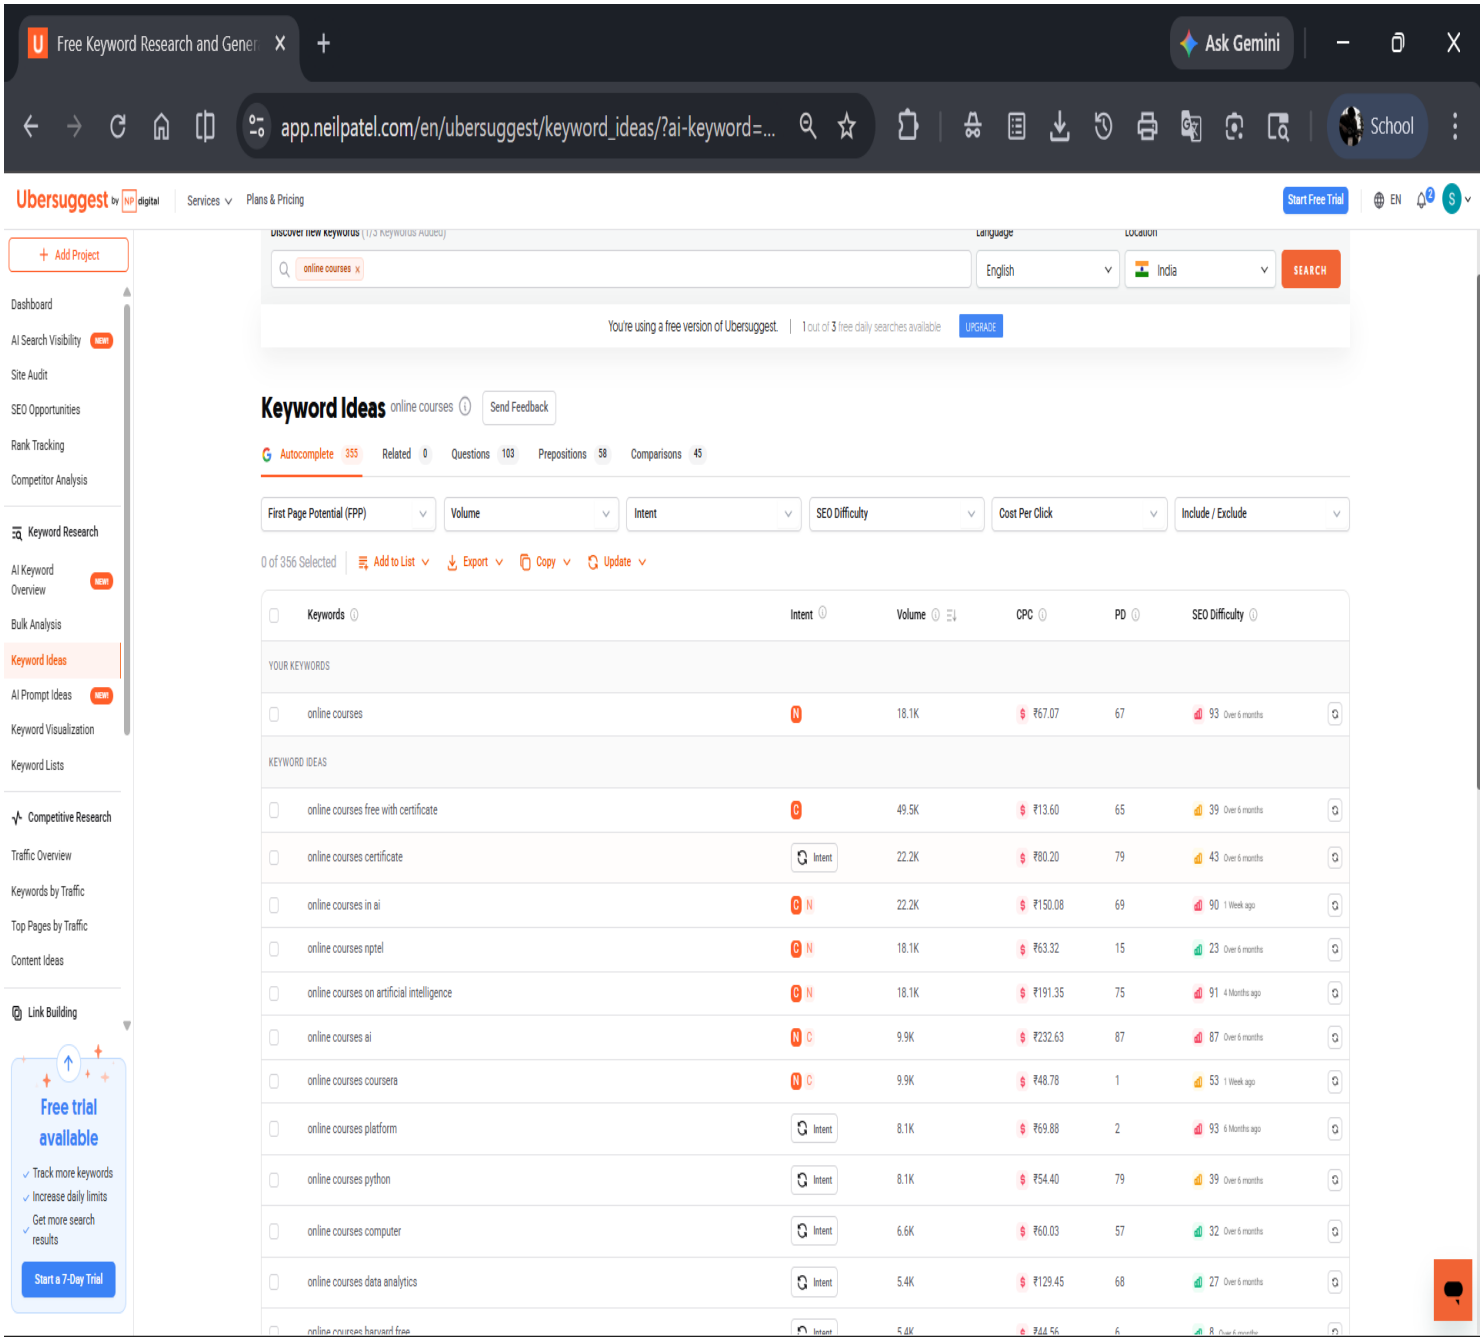

Figure 13: Screen Capture of Ubersuggest

III. Keywords Selected

The following keywords have been selected on the basis of their significance, traffic, and competition:

- online courses India
- online courses with certification
- top online courses for students
- digital marketing course online
- web development course India
- online courses for beginners
- HR course online India
- cheap online courses
- learn to code online for beginners
- online courses platform

IX. On-Page SEO Implementation :

Optimization of the website involved use of key on-page SEO strategies. This was done through use of meta tags such as titles, descriptions, and keywords that would help to identify what the website is all about. The hierarchy of headings was also followed (H1, H2, H3).

Keywords were used within the website to ensure the site remained optimized while ensuring that the user interface remains optimal. Moreover, image alt tags were included to increase image optimization. Lastly, internal links between various pages, such as Home, Courses, and About, were incorporated.

Phase 4: Content Marketing Plan

Content Strategy :-

A well-structured 4-week content marketing plan has been created to ensure audience engagement. The plan involves blog posts, Instagram content, reels, and YouTube shorts.

Topics for blog posts relate to career growth and skill development, while social media content targets the user engagement. Canva was used to create visually compelling content for maintaining professionalism.

The call-to-action is included in every piece of content that directs the reader to the company website.

Content marketing is an effective tool that is utilized for attracting and engaging people through relevant and valuable content. The following content marketing strategy has been developed for attracting the audience on an e-learning platform. This platform provides courses to the users in order to teach them skills and help them grow in their careers.

A structured content plan is developed that is supposed to run for 4 weeks. It includes topics related to skill development, career growth, and learning. Blog posts include topics like "Top Skills in 2026," "Getting a Job after Online Course Completion," and "HR Courses for Beginners."

Instagram posts are focused on short videos, informative posts, and user success stories. Visual content is also developed using Canva to engage the users.

➢ **Placing Screenshots:**

Figure 14: Canva Post

Phase 5: Paid Ads Campaign

Ads Strategy:-

Paid ads are implemented to attract instant visitors and target users efficiently. For the current project, a sample campaign was developed through Google Ads.

The purpose of this campaign is to increase traffic by targeting the people who are looking for online courses. A search campaign was chosen because it targets users who have intent to learn something.

Keywords like “Online Courses in India,” “Digital Marketing Course,” and “Web Development Course” are relevant for the campaign. The daily budget of ₹500 was set for demonstration purposes only.

The ad copy was crafted with interesting headlines like “Learn Job-Ready Skills Online” and “Affordable Courses for a Bright Career.” The description mentions perks like learning from experts and career progression.

This campaign was developed up until the preview stage without launching. Hence, no charges would be incurred. This example showcases an advertisement approach utilized in digital marketing.

➢ Screenshot Locations :-

What's your campaign objective?

Choose your objective

Select an objective to tailor your experience to the goals and settings that will work best for your campaign

Sales
Drive sales online, in app, by phone, or in store

Leads
Get leads and other conversions by encouraging customers to take action

Website traffic
Get the right people to visit your website

Product and brand consideration
Encourage people to explore your products or services

Brand awareness and reach
Reach a broad audience and build awareness

App promotion
Get more installs, interactions and pre-registration for your app

Local store visits and promotions
Drive visits to local stores, including restaurants and dealerships.

Create a campaign without a goal's guidance
Choose a campaign type first, without a recommendation based on your objective.

Figure 16 → Ad Preview

Phase 6 : Social Media Strategy

Social Media Plan :-

Social media marketing is a vital aspect when it comes to creating brand awareness and interacting with customers. In social media strategy, the focus will be on Instagram and LinkedIn.

Three posts are made each week in accordance with a set posting strategy, which includes one reel post, one carousel post, and one testimonial post. Instagram will be used for posting reels and regular posts, whereas LinkedIn will be used to post professional content related to careers and achievements. Hashtags such as #onlinecourses, #learnskills, and #careergrowth are used.

Designing of content will be done using Canva in order to ensure that the content looks professional. This strategy will help attract customers, engage them, and generate web traffic.

➢ **Screenshot Placement :-**

Figure 17: Instagram Post

Phase 7: Analytics and Tracking

Introduction to Analytics:-

Analytics is crucial in assessing the website's performance and learning about its users' behavior. In the case of this project, Google Analytics is utilized for tracking users' activities.

Some of the insights provided by the tool include the number of visitors, time spent on the site, bounce rate, and page views. Such information will allow identifying user interaction with the site and evaluating its performance.

The process involves signing up, generating the measurement ID, and implementing the tracking code onto the website. While this is a simulated set-up, it illustrates how actual analytics works in practice.

With proper analysis of data, firms can make well-informed decisions and enhance their marketing efforts. Analytics is integral in enhancing users' experiences and boosting conversion rates.

Result & Outcome:-

- Successfully created and launched website
- Installed Google Analytics tracking
- Applied SEO practices
- Optimized UI/UX design
- Developed digital marketing strategy

➢ Placement of the screenshot:

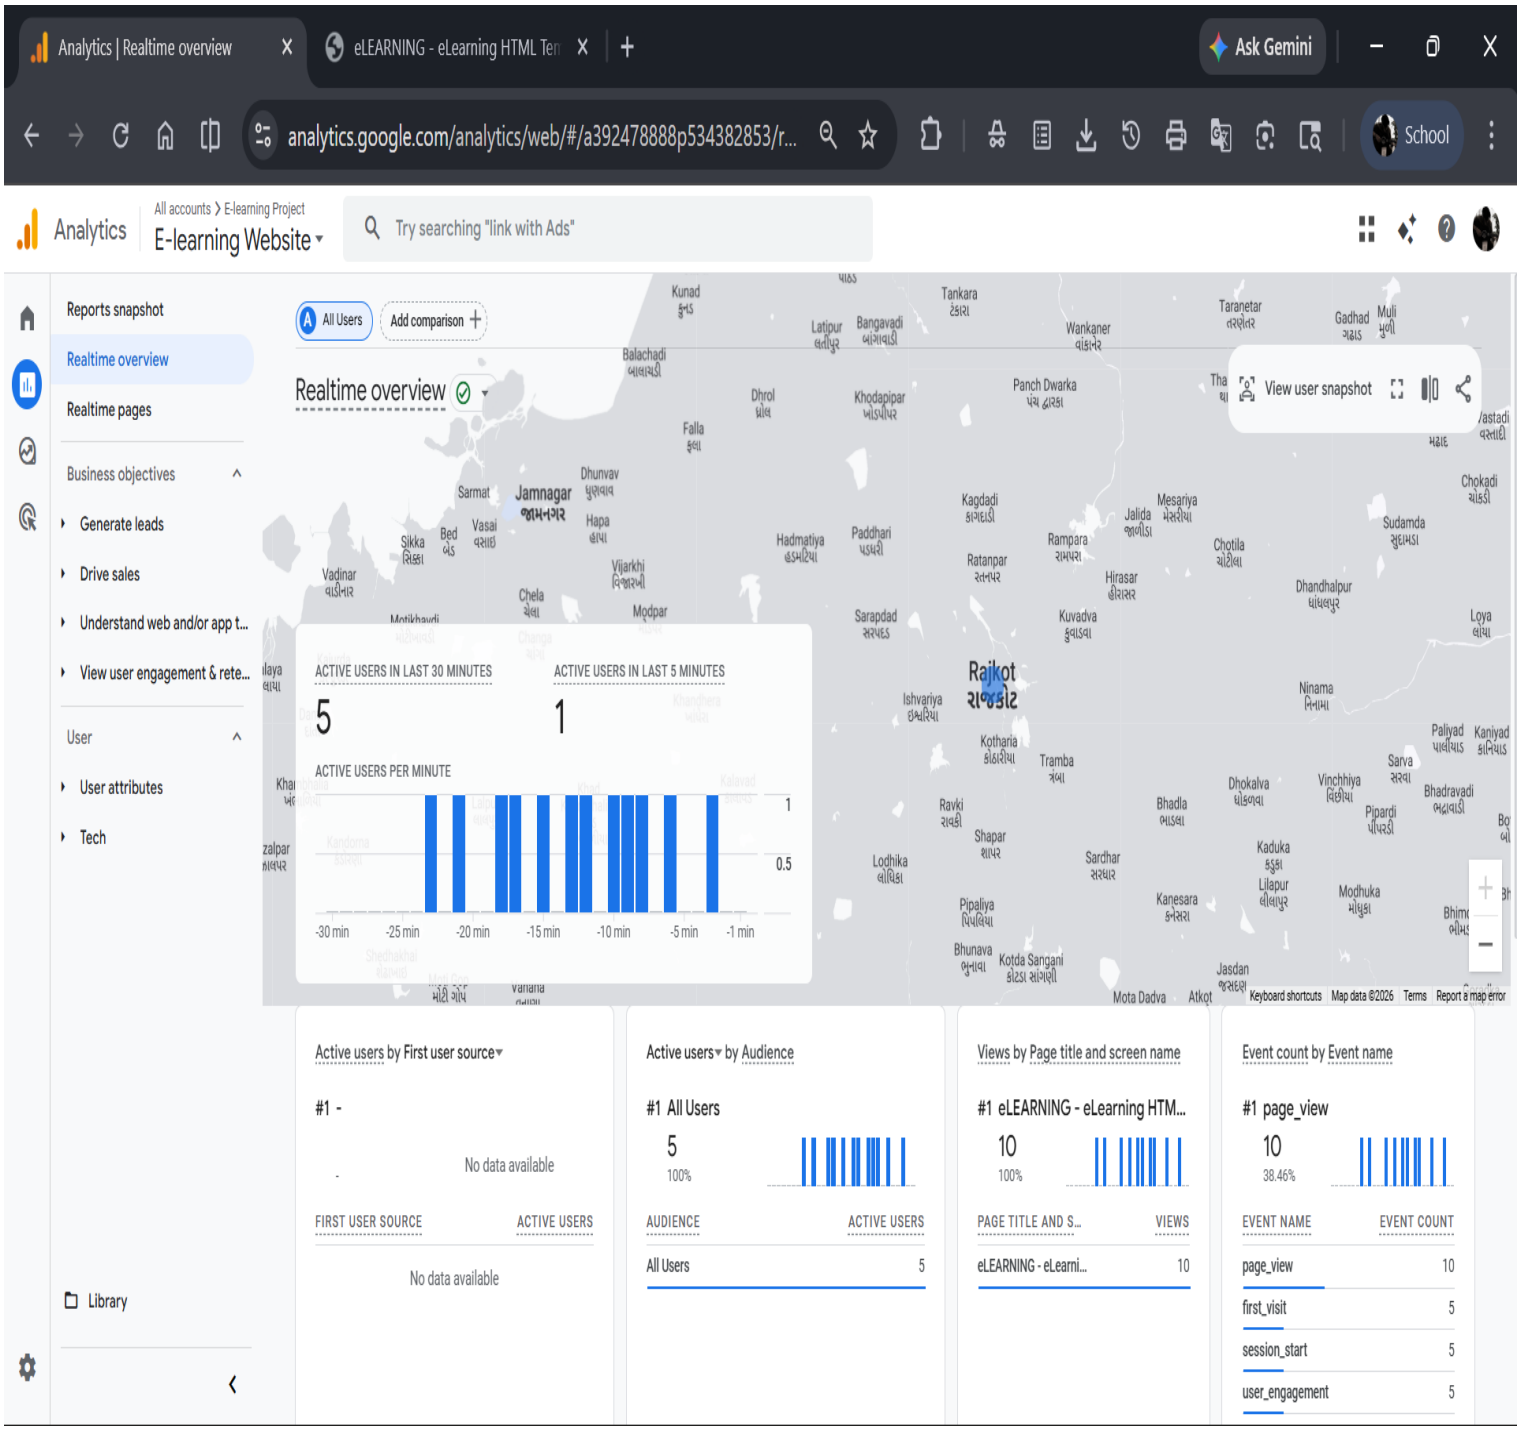

Figure 18: Google Analytics Realtime

12. OUTCOMES

The project was able to accomplish its purpose of creating an e-learning platform through effective digital marketing strategies.

There was efficient implementation of Google Analytics that made it possible to track users and website activity in real-time. When the platform was tested, several users could be seen interacting with the site, confirming the effectiveness of the tracking process.

SEO on-page factors like meta tags, headers, and images' alternate attributes were optimized to make the website more visible. The site’s user interface was also reengineered for better usability.

In addition, the platform became completely responsive.

13. CONCLUSION

In this project, you see the practical implementation of digital marketing principles into a real-life setting. All the processes involved in this case study help create a whole ecosystem in digital marketing.

The usage of analytics tools proves that the approach taken here is very effective. You can also see why user experience and structured content matter in the world of digital marketing today.

To sum up, this project can become a good basis for understanding and applying digital marketing principles professionally.
